Quality and Environmental Compliance

Who We Are

Biosar is known for its Quality organic fertilizers and manure. Biosar is presently available throughout Eastern and North Eastern India, and parts of South, Central and North India. The company eventually aims to market its products across the country. Innovation has always been one of Biosar's secret ingredients to success. With its assortment of raw materials, ranging from cakes to manures to a variety of organic fertilizers, it caters to almost every village. In addition, as part of its drive to establish a presence across India, Biosar has invested in state-of-the-art manufacturing facilities in North and West Bengal.

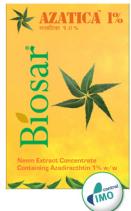

Our Expansion

Biosar helps build better lives. Since its inception in the year 2001, Biosar has been recognized for its quality organic fertilizer and manure. Biosar has carved a niche for itself in the market in a fairly short span of time. It is ranked amongst the top fertilizer brands in the markets where it competes.

Product	Name	Description
	BIOSAR MAX TEE	BIOSAR MAXTEE is a Biological Plant Growth enhancer. BIOSAR MAXTEE is a complete nutrient solution made with organic substance & added nutritive & element, which helps to increase & enhance quality even in cold condition. BIOSAR MAXTEE provides all macro-nutrients in easily available form & micro-nutrients in natural chelated form. It acts as a growth stimulator for Root, Shoot & Leaves. It imparts tolerance to stress condition.
	BIOSAR Growmax Tea	Biosar Gromax Tea is a special macro & micro nutrient comprises of Nitrogen, Potassium, Sulphur, Calcium, Magnesium, Zinc, Boron and Manganese. Biosar Gromax Tea special shows positive effect on growth of leaves by directly involving in plant Metabolism, Chlorophyll content of the
	BIOSAR Natura	Contains a high percentage of humic acid, which releases the non-available phosphate into available form by the action on chemical & metabolic activity of microorganisms Liquid manure is rich in Nitrogen and the microorganisms present in it also protects the crop bacterial & fungal diseases.
	BIOSAR TANSY	BIOSAR TANSY is a dynamic Bio-Formulation for Lepidopteron pest, Loppers & Caterpillars, those are the most damaging & destructive pests & dominating the pest scenario in Bengal. BIOSAR TANSY is safe for natural enemies. It helps in removing the toxicity of pest infestation. It compatible with the most convenient chemical.

BIOSAR AZATICA 1%

AzatICA is an emulsifiable concentrated Azadirachtin. It is also used as an anti feedant. As the concentrate is very bitter in taste and when sprayed on leaves makes it very distasteful for the bugs to eat. Biosar AzatICA 1% contains 10000 ppm azadirachtin concentrated neem powder with high degree of stability which is effective with a very minimum dosage. It is best suited for crop like Aphids, Leaf hopper, Mealy bugs, Mites Seals and White Flies, Caterpillars.

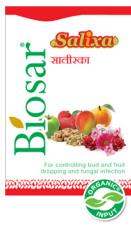

BIOSAR AZATICA 5%

AzatICA is an emulsifiable concentrated Azadirachtin. It is also used as an anti-feed ant. As the concentrate is very bitter in taste and when sprayed on leaves makes it very distasteful for the bugs to eat. Biosar AzatICA 5% contains 50000 ppm neem power is used to control board spectrum pest which has an excellent Phyto toxic effect. It is best suited for crop like Aphids, Leaf hopper, Mealy bugs, Mites Seals and White Flies, Caterpillars.

BIOSAR SUL-L

Biosar Sul-L is a Secondary nutrient liquid fertilizer containing sulphur in the easily available and absorbable form. Biosar Sul-L is a combination of Lime Sulphur and elemental Sulphur that can be used to treat various garden parts and diseases. It is best suited for crop like Thrips, Red Spider mites, Various fungal diseases of vegetables, horticultural crops, Plantation crop.

BIOSAR Salixa

Bisor salixa is a combined product based on Salicylic acid and extract of medicinal plant. Bisor salixa activates the plants to form more wound tissue, accelerating further growth in these areas. It reduces the flower & fruit dropping by developing immune system. It is best suited for crop like All types of flower, Fruits, Vegetables, Cereals, Powdery mildew, Dowry mildew, Fusarium, Alternaria, Mycosphaerella, Scab, All kind of rust.

BIOSAR is derived from the Greek word 'BIOS' which means 'life' and Sanskrit word 'SAR' which means 'complete'. BIOSAR provides complete life to the agricultural sector. BIOSAR is the result of enduring efforts of many scientists and domain experts working in the field of agronomy, agroecology and permaculture.

BIOSAR products are tested in the quality control laboratory of the above institutes. BIOSAR will provide the impetus, skill and the expertise to drive new green environmentally friendly products into your local market and will bring revolution in the business of organic farming.

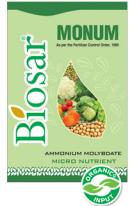

Biosar lays the foundation and completely conforms to the Organic Input mark of international quality standards conformity.

BIOSAR comes with a premium range of quality organic fertilizer, bio-fertilizer and bio-pesticides and shares an established history of expertise in fertilizer manufacturing.

Quality Control is an essential aspect of the manufacturing process and the facility is also equipped with a state of art laboratory equipped with all modern instruments.

BIOSAR MONUM

Biosar MONUM is an important micronutrient comprises ammonium molybdate, which is utilized by selected enzymes in plants, to carry out redox reactions. Enzymes that require molybdenum for activity include nitrate reductase, xanthine dehydrogenase, aldehyde oxidase and sulphide oxidase. Loss of Mo dependent enzyme activity impacts upon plant development, in particular, those processes involving nitrogen metabolism. molybdenum deficiency usually occurs in the acid soil. It is best suited for Paddy, Vegetables.

BIOSAR MINTRO

Facilitating sustainable increase in crop field and quality, Biosar MINTRO is a fortified fertilizer essential plant nutrition, when an essential element is at a low concentration that severely limits field and produces more or less distinct deficiency symptoms. At that situation spraying of Biosar MINTRO will give a successful result. It is best suited for All crops, Vegetables, Paddy, Wheat.

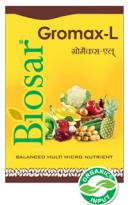

BIOSAR POTATO

BIOSAR GROMAX for POTATO increases microbial activity in soil and improves plant metabolic process. BIOSAR GROMAX increases stem elongation, helps to break dormancy, it improves crop size and quality. It improves photosynthesis and carbon fixation. It accelerates the seed germination and enzyme induction in plants. It is best suited for Potato.

BIOSAR GROWMAX

BIOSAR GROMAX for BANANA increases microbial activity in soil and improves plant metabolic process. BIOSAR GROMAX increases stem elongation, helps to break dormancy, it improves crop size and quality. It improves photosynthesis and carbon fixation. It accelerates the seed germination and enzyme induction in plants. It is best suited for Banana.

BIOSAR Gromax-L

Biosar Gromax L is a micro nutrient in combination with added vitamins in liquid form. Biosar Gromax L is useful in stem elongation, improves crops size and quality. It accelerates and induces in plants the seed germinator enzymes. Biosar Gromax Tea increases the soil aeration and improves the plant metabolic process. It is best suited for All Crops.

---------	------	-------------

BIOSAR DOCTER

A broad-spectrum fungicide, bactericide cum insecticide. It is a mixture of eugenol, alliin, carvacrol, thymol, azadirachtin and natural ketones. BIOSAR DOCTOR is a broad-spectrum botanical fungicide, bactericide & insecticide. It is a research proven eco-friendly natural aid, comprises of vital natural extract of various plants. It is best suited for crop like Paddy, Groundnut, Vegetables, Fruits, Pulses, Flower, Medicinal Plants.

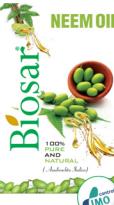

BIOSAR Add-on

It is non-ionic bio-based adhesive. Mixed with pesticides, the spray helps in spreading the pesticides/fungicides/growth regulators in the leaf and prevent washing out from the leaf surface. It is a 100 % bio-organic product made from all bio elements and has no trace of any chemical. BIOSAR ADD-ON is an organic based spreader, sticker cum activator used in all kind of pesticides. It is used with any kind of pesticides. It is a quick absorber & fast spreader. It is best suited for crop like Cereals, Pulses Oil seeds, Vegetables, Fruits, Ornamental Crops.

BIOSAR Doctor-Tee

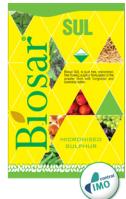

BIOSAR DOCTOR TEE is a unique molecule, organic in nature with a combination of extracts from different plant source which have been found to have adverse effect & repellence on target insects. DOCTOR TEE acts as a repellent, thereby preventing the pest from settling on plants, trees, fruits etc. causing mortality by starvation through its anti-feed ant property. It helps in vigorous root growth. It is target specific & do not destroy beneficial organisms. It is best suited for crop like Blast, Blight, Rots, Damping off, BLS.

BIOSAR NEEM OIL

Neem oil is a non-toxic organic pesticide for the crops. Neem oil is mostly used in organic gardens because it is non-toxic, safe and effective to control insect and diseases. It is beneficial to garden insects such as predatory wasps, honey bees, earth worm, ants, spiders, lady bugs, and adult butter files. It is best suited for crop like Aphids, Thrips, assids, Nematodes, Mealy bugs, Lepidopteran Larva.

**BIOSAR
SUL**

Biosar Sul is a secondary nutrient fertilizer containing Sulphur in easily available & absorbable form. It is available in both solid & liquid form. Biosar Sul is a combination of lime Sulphur and elemental Sulphur that can be used to treat various garden pest & diseases. It is effective against Thrips and Red spider mites with a strong vaporization and contact activity. It is best suited for crops like Groundnut, Pea, Sorghum, Cowpea, Moong, Citrus, Chilli, Cumin beans, Apple, Grapes, Mango.

**BIOSAR
Sampoorna**

It is otherwise known as Phosphate Rich Organic Manure (PROM). It is enriched with all beneficial microbial cultures to make nutrient available over a long period of time. Biosar Sampoorna contains a high percentage of Phosphorus along with Nitrogen, Potassium and Carbon to ensure that soil get ample nutrient for its overall growth resulting in improvement of soil quality and complete nutrition to the Plants. It is best suited for crops like Tea, Potato, Vegetables, Cereals, Pulses & Oil seeds, Fruits & Flower.

**BIOSAR
COCx**

Biosar COCx comprises of Copper Oxychloride-Tech 85%, is protective wettable fungicide having double effect of systematic, contact and preventive action. Copper can be used on numerous crops against fungal and bacterial diseases. It can serve as a fatal enemy of major obstinate disease in growing period of the crop. Its active molecule penetrates with high performance expanding overall with the allying plant, sterilizing inside & outside. It is best suited for crops like Potato, Cereals, Tomato, Tea, Coconut, Tobacco, Fruits, Grapes, BalanceNuts.

Product	Name	Description
---------	------	-------------

**BIOSAR
MGS**

Biosar MGS comprises of water-soluble Hydrated Magnesium Sulphate, which is an essential plant nutrient. Biosar MGS is critical for seed germination and the production of chlorophyll. Magnesium strengthens the cell walls and helps plants to update with Nitrogen, Phosphorus, and Sulphur. It is best suited for Potato, Tomato, Peppers, Roses, Mango, Guava, Vegetables, Citrus.

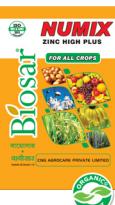

**BIOSAR
ZN21**

Biosar Zn- 21 is the essential micro nutrient which is crucial for the growth of Plants and required by plants in small quantities. Zinc 21 is one of the important constituents of several enzymes and proteins which play a significant role in a wide range of processes. It is best suited for Potato, Paddy, Wheat, Flower, Vegetables, Fruits, Plantation crops.

**BIOSAR
B20**

Biosar 20, is a micro nutrient which is critical to the growth and health of all crops. Boron is used in calcium cell wall synthesis and is essential for cell division (creating new plant cell), fruit and seed development, sugar transport and hormone development. Some functions of boron are interrelated with those of Nitrogen, Phosphorus, Potassium and Calcium in plant. It is best suited for Paddy, Wheat, Potato, Betel vine, Vegetable & flowers.

**BIOSAR
NUMIX**

Biosar Numix is the most efficient product to correct the zinc deficiency in plants. Zinc is essential for plant growth, synthesis of plant hormone as well as plays a major role in nucleic acid and protein synthesis. It is best suited for Potato, Paddy, Banana, Horticultural, Crops, Vegetables, Grapes, Orange etc.

Product	Name	Description
---------	------	-------------

BIOSAR POWER

High nitrogen content of BIOSAR POWER is effective in constitution of plant substances like protein, chlorophyll, hormones, alkaloids & vitamins. This contains high percentage of Nitrogen in comparison to phosphate and potash. BIOSAR POWER helps in conditioning the soil structure, maintaining the pH level, improving the water holding capacity & in better root proliferation. It is non-toxic, hence does not leave any harmful residue & does not cause any soil pollution. It minimizes the use of chemical fertilizers by 20%. It is best suited for plant like Tea, Betel Leaf, Mustard Leafy, Vegetables, Cereals & Pulses.

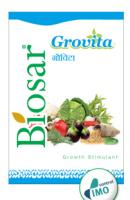

BIOSAR Nitrostar

Biosar Nitrostar is an energizer and stimulant. It helps plants to increase carbon, nitrogen ratio significantly. It acts as yield booster. It is a granular fertilizer containing high nitrogen which helps to increases the crops yield. It helps the plants to increase carbon, nitrogen ratio significantly. It is best suited for plant like Paddy, Wheat, Maize, Tea, Pulses, Vegetables.

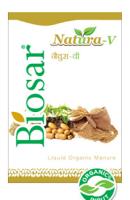

BIOSAR Hira

BIOSAR HIRA is an organic manure and it helps the plant to get supply of all nutrients in a systematic & balanced way. BIOSAR HIRA contains high percentage of Carbon. It is best suited for plant like Fruits, Vegetables, Watermelon, Banana, Pulses, Oilseed's, Organic Products.

BIOSAR Grovita

BIOSAR GROVITA is a Biological Plant Growth enhancer. Biosar Grovita acts as a growth stimulator for Root, Shoot, Leaves and Flowers. Biosar Grovita also imparts tolerance to stress condition. It enhances the growth of the plant, and apical bud initiation of tea cutting. Biosar Grovita accelerates the metabolic processes and increases chlorophyll and photosynthetic activities. It is best suited for plant like Paddy, Vegetables, Fruits, Jute, Betel Leaf, Groundnut, Mushroom.

BIOSAR Natura-V

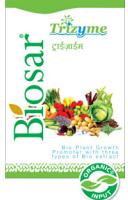

BIOSAR NATURA V is a Biological Plant Growth enhancer. Contains a high percentage of humic acid, which releases the non-available phosphate into available from by the action on chemical & metabolic activity of microorganisms. Liquid manure is rich in Nitrogen and the microorganisms present in it also protect the crop bacterial & fungal diseases. It is rich in N content; it increases the succulence of the leaf. It results on the dry matter yield & plant height. It is best suited for plant like Tea, Potato, Paddy, Saplings, Betel Pulses, Vegetables, Leafy Vegetables.

Product	Name	Description
---------	------	-------------

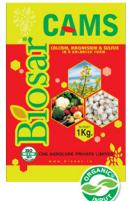

BIOSAR moti

BIOSAR MOTI boosts soil fertility, improving both the biological and physicochemical properties of the organic material. BIOSAR MOTI is a vermis-compost manufactured in a systematic & efficient way to meet the requirement of bulk consumers. It is best suited for soil like Vegetables, Fruits, Tea, Medicinal Plants, Organic Produce.

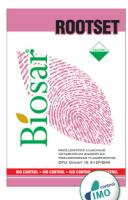

BIOSAR Trizyme

Biosar Trizyme increases the protein synthesis of plants and helps to catalysis the physiological process effectively. A nitrogen containing amino acid with zinc, humic acid and hormones to act as fertilizers and catalyst. It is best suited for soil like Potato and other Vegetables, Pulses, Maize Tea, Coffee, Sugarcane, Cotton, Sapling, Ornamental Plants, Fruits.

BIOSAR CAMS

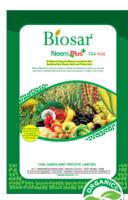

Biosar CAMS is a unique combination of secondary nutrients based on Calcium, Magnesium and Sulphur. These are very important and often are required as fertilizer or as soil amendments. Secondary nutrient is moderately required by plants. Secondary nutrients play a major role in building up chloroplasts and help in photosynthetic activities in almost all crops. It is best suited for All crops.

BIOSAR ROOTSET

Biosar Root set is a multi-functional fungicide cum insecticide based on selective strain of naturally occurring fungi & bacteria i.e., Pacelomyces lilacinus, Metarhizium anisopliae and pseudomonas fluorescens.

In Biosar Root set, presence of fungal & bacterial strains, protect the plants from nematode attack and infection by producing the secondary metabolites like anti metabolites & hydrogen cyanide. It is best suited for soil like Cereals, Pulses & Oil Seeds, Vegetables, Fruits & Flowers.

BIOSAR NAAM PLUS

Biosar Neem Plus provides NPK + Humic acid+ Fulvic acid + all essential Micro nutrients. This product is 100% Organic in nature. This is helpful for better root growth, improving soil properties, betterment in water holding capacity, better soil-water-air relationship and overall plant growth and also has insecticidal effects to the roots. It is best suited for soil like Cereals, Pulses, Vegetables, Flowers, Fruits, Tea, Sugarcane.
